EDUCATION

University of California, Berkeley	**B.S. Computer Science (CS)**
GPA: 3.3	**Graduating**: Fall 2016 (Early)

RELEVANT COURSEWORK (includes Spring 2016)

CS160 (Android Design & Development), CS188 (Artificial Intelligence), CS168 (Networking - Protocols and Architecture), CS162 (Operating Systems), CS170 (Efficient Algorithms & Intractable Problems), CS186 (Databases), CS161 (Security), CS61C (C & MIPS), CS61B (Java & Data Structures), CS61A (Python & the Structure/Interpretation of Computer Programs), CS70 (Discrete Mathematics & Probability Theory)

TECHNICAL SKILLS

Proficient in: **Python, Java, C, HTML, CSS, Android, Scheme, MIPS**
Experience in: **JavaScript, jQuery, PHP, SQL, JSON, Framer.js, Apache Spark & Hadoop**

PROJECTS (code provided upon request)

Duty Logger (in progress) - Android app. for UC Berkeley Residential & Student Service Programs to help resident assistants and other security staff log and report incidents in the residence halls.

Plutus - Android budget app. w/ Wear companion app. targeting inexperienced American travelers. Allows users to enter expenses, exchange currency at current rates and stay updated about their budgets.

MIPS CPU - Designed and implemented the logic of a CPU to support the MIPS instruction set using Logisim.

Scheme Interpreter - Python program that interprets Scheme expressions.

Huffman Encoder - Java lossless data compression program for encoding and decoding files and directories.

Fifteen Puzzle Solver - Program that strongly solves Fifteen puzzles iteratively through A* search, implemented using Apache Spark's MapReduce model.

EXPERIENCE & LEADERSHIP

Software Engineer Intern – Schoolzilla, PBC.   **10/06-Present**
- Building a data upload tool supporting multiple file formats, to allow users seamless compilation of data from different sources into tailored reports.

Web Developer for Berkeley Student Human Resources Association   **08/15-Present**
- Communicate with the organization's leadership, and use their input to create, design, and maintain their website, their main attractor of new clients.

CS61B (Java & Data Structures) Course Reader   **01/15-Present**
- Host office hours and small discussion sections for students requiring extra help, use and develop scripts to automatically grade coding assignments, and help create course material.

Undergraduate Computer Science Mentor   **01/15-Present**
- Pair with a few students a semester to provide individualized academic and social support for lower division Computer Science courses. Specific roles vary depending on students' needs.

Resident Assistant   **05/15-Present**
- Create community by hosting social events, encourage personal and academic development by acting as a student resource, and maintain the safety and well being of students.
